

• INTRODUCING HALCYON ONE

Silence, *sculpted.*

Spatial audio earbuds machined from a single billet of aerospace titanium — tuned by ear, calibrated by algorithm.

[Pre-order — \\$349](#)[▶ Watch the film](#)

• OVERVIEW

Four decisions, one obsession.

Every part earns its place. Nothing here is decoration.

Adaptive spatial audio

Sound that tracks your head, not your device — nine-axis motion sensing keeps the stage locked in place as you move.

−42dB of silence

Dual-feedforward noise cancellation removes the room, so what's left is only what you chose to hear.

Aerospace titanium

Each shell is milled from one solid billet — no seams, no plastic, ounces lighter than it looks.

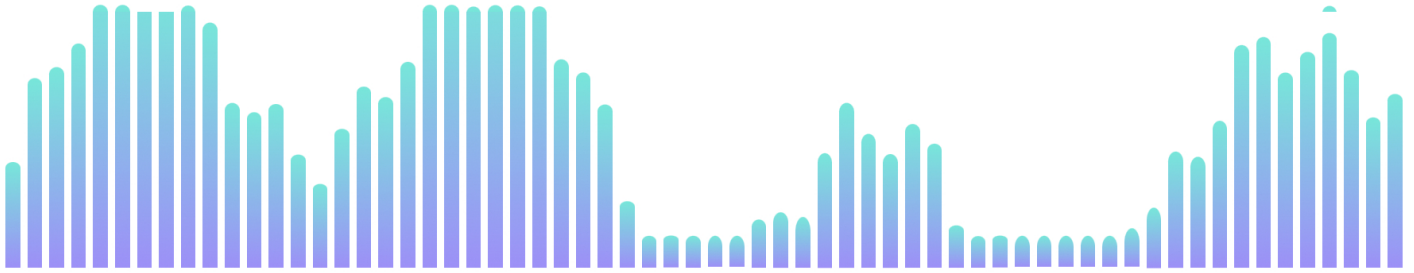

30-hour case

A full week of mornings on one charge. Five minutes in the case buys three hours of playback.

• SOUND

A signature you can see.

Scroll to hear the range. Every bar is real driver response, not decoration.

40 kHz

Frequency ceiling

-42 dB

Noise floor

9-axis

Motion tracking

0.9 ms

Head-tracking latency

• DESIGN

Three passes. No shortcuts.

The order matters — each stage depends on the one before it.

01

Milled

A single titanium billet is cut on a five-axis CNC over 40 minutes, then hand-polished to a satin finish.

02

Tuned

Acoustic engineers voice every driver by ear against a reference room before any DSP is applied.

03

Calibrated

An in-app ear scan builds a personal response curve, matched to the

...can appear even with a personal response scan, matching the
shape of your own ear canal.

• FINISH

Choose your metal.

Three finishes, one shell. Anodized, not painted — the color goes all the way through.

- Graphite
- Champagne
- Glacier

• COMPARE

Where the difference is measured.

SPEC	HALCYON ONE	STANDARD EARBUDS
Shell material	Milled titanium	Injection-molded plastic
Noise floor	-42dB, dual-feedforward	-24dB, single-mic
Spatial tracking	9-axis, 0.9ms latency	Not supported
Ear-fit calibration	Personal scan profile	Three generic tip sizes
Battery, case included	30 hours	18 hours

*“We didn't chase louder. We
chased quieter — until the only
thing left was the music.”*

Mara Lindqvist

Principal Acoustic Engineer, Halcyon Labs

• AVAILABILITY

Reserve yours.

Ships in October. Reserving costs nothing until the day it
leaves the mill.
